

Auchenflower station accessibility upgrade

WORKS NOTICE

Night works – overhead line infrastructure

February 2020

The program of early works in preparation for the Auchenflower station accessibility upgrade continues with overhead line infrastructure installation on **selected nights in February, between 9pm and 5am** the next day (weather and construction conditions permitting). For the safety of workers and the public, these works have been scheduled after hours, when there is reduced rail traffic.

A lane closure with traffic management will be in operation as required – see below for locations and details. During lane closures, local and hospital access will be maintained at the instruction of the traffic controller.

Residents near the station may experience some noise associated with construction activity and the operation of cranes and truck movements around the work zone. Every effort will be made to minimise disruption and we apologise for any inconvenience as we undertake this concentrated period of early works.

Overview of night works
