

Buranda station upgrade

Project update - February 2023

As part of Queensland Rail's ongoing Station Accessibility Upgrade Program, Buranda station is being upgraded to provide a service that is accessible, easy to get to, and easy to use.

Since sharing early designs with the community, Queensland Rail has been working closely with the adjacent Transit Oriented Development to ensure Buranda's new design better integrates with the area's surrounding development and supports improved transport connections.

This upgrade will provide access paths from accessible station entrances to the assisted boarding points, achieved through platform raising and upgrading accessible parking and essential station and customer facilities.

Queensland Rail staff will be on-site at Buranda station to present the new concept designs between:

- 6.30am and 9am on Tuesday 14 February
- 3.30pm and 6pm on Wednesday 15 February
- 6.30am and 9am on Thursday 16 February

Queensland Rail will provide further updates to the community once more details about the project's delivery are known.

Scan the QR code to view the designs on our online project page.
