

Cannon Hill station accessibility upgrade

PROJECT UPDATE – FEBRUARY 2022

The Cannon Hill station accessibility upgrade is part of the State Government's ongoing investment of more than \$500 million to upgrade stations across the South East Queensland network, making them more accessible for customers.

Project progress

The following works have recently been carried out at Cannon Hill station:

- completion and opening of the new station entrance onto platform 2 (image below)
- asphalt works on both platforms, including the front of the station ticket office
- kerb and asphalt works between the back of platform 2 and the Cannon Hill depot
- removal of temporary fencing in the northern park 'n' ride and reinstatement of 18 car spaces
- installation of downpipes to the back of both platform canopies and footbridge stairs
- completion of lightpole installations, landscaping and garden bed works throughout the precinct.

Upcoming works

Customers and the local community can expect to see the following activities over the coming weeks:

- finalisation of platform infrastructure and station signage installations (image across)
- finalisation of lift shaft works
- ongoing reinstatement of permanent fencing
- carpark rectification works and line marking in the northern park 'n' ride
- defect rectification and station cleaning works.

Construction impacts

During the station upgrade, changes due to construction activities may include:

- changed parking and traffic conditions for safety
- noise associated with heavy machinery
- temporary changes to access paths throughout the station precinct and surrounding areas
- increased vehicle movements near works
- the use of mobile lighting towers (for night works).

Normal working hours are 6.30am to 6.30pm, Monday to Saturday.

The local community will be given advance notice of construction activities likely to cause impacts, including after hours work (nights, Sundays and public holidays).

We thank you for your patience and cooperation as we build you a better Cannon Hill station.
