

# Cannon Hill station accessibility upgrade

WORKS NOTICE

## UPDATED Night works – overhead line infrastructure

### August 2019

In preparation for the Cannon Hill station accessibility upgrade, overhead line infrastructure works will be undertaken on **selected nights in August**, between **10pm and 5am** the next day. An additional week of night works has been added to the program previously notified.

Due to the nature of these works and for the safety of workers and the public, these works have been scheduled after hours, when there is no rail traffic and the overhead power is switched off.

Residents near the station may experience some noise associated with construction activity and truck movements. Mobile lighting towers will be used during night works.

Every effort will be made to minimise disruption and we apologise for any inconvenience as we undertake this concentrated period of early works.
